Non-Invasive Temperature Monitoring with Surface Mounted Probes

Leonard's new **LMS-188-4P-SM** simplifies installation by eliminating the need to cut into piping. Probes remain on the outside for external installation by simply strapping to the existing pipe. Complete temperature monitoring with no need for installation downtime for piping cut-ins! Low cost for budgetary conscious projects.

IDEAL FOR: Nursing homes, small hospitals, assisted living facilities.

Intended to help Health Care Buildings comply with:

ASHRAE 2000 & 188 Standards
CPC-OSHPD Section 613.5

Safeguard against Legionella

-  For surface mount applications
-  4 probes with 2" sheath
-  Easy, simple installation without piping modifications
-  Audio & Visual alarms
-  Adjustable high & low set points
-  Min/Max temperature
-  Remote alarm contacts
-  Battery back-up
-  UL Listed
-  Low cost
-  Optional installation kit available with all necessary components
-  Option- Available with BMS

Allows compliance for
**ASHRAE 2000 &
188 Standards**

Allows compliance for
**CPC-OSHPD
Section 613.5**
